UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 8-K

CURRENT REPORT Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported): March 15, 2024 (March 15, 2024)

Ensysce Biosciences, Inc.

(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization) 001-38306 (Commission File Number) 82-2755287 (I.R.S. Employer Identification Number)

7946 Ivanhoe Avenue, Suite 201 La Jolla, California (Address of principal executive offices)

92037 (Zip Code)

(858) 263-4196 Registrant's telephone number, including area code

N/A

(Former name or former address, if changed since last report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation to the registrant under any of the following provisions:

□ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

□ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

□ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

□ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered			
Common Stock, par value \$0.0001 per share	ENSC	The Nasdaq Stock Market LLC			

Emerging growth company \Box

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 2.02. Results of Operations and Financial Condition.

On March 15, 2024, Ensysce Biosciences, Inc. (the "Company") issued a press release announcing its financial results for the fiscal quarter and year ended December 31, 2023. A copy of the press release is included as Exhibit 99.1 to this Current Report on Form 8-K.

The information in this Item 2.02, including Exhibit 99.1 attached hereto, shall not be deemed to be "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor will they be deemed to be incorporated by reference in any filing under the Securities Act of 1933, as amended, except as will be expressly set forth by specific reference in such a filing.

Forward-Looking Statements

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements may be made directly in this report. Some of the forward-looking statements can be identified by the use of forward-looking words. Statements that are not historical in nature, including the words "anticipate," "expect," "suggests," "plan," "believe," "intend," "estimates," "targets," "projects," "should," "could," "would," "may," "will," "forecast" and other similar expressions are intended to identify forward-looking statements. All forward-looking statements are based upon management estimates and forecasts and reflect the views, assumptions, expectations, and opinions of the Company as of the date of this report, and may include, without limitation, changes in general economic and political conditions, all of which are accordingly subject to change. Any such estimates, assumptions, expectations, forecasts, views or opinions set forth in this report constitute the Company's judgments and should be regarded as indicative, preliminary and for illustrative purposes only. The forward-looking statements and projections contained in this report are subject to a number of factors, risks and uncertainties, some of which are not currently known to the Company, that may cause the Company's actual results, performance or financial condition to be materially different from the expectations of future results, performance or financial condition to be materially different from the expectations of future results, performance or financial condition to be materially different from the expectations of future results, performance or financial condition to be materially different from the expectations of future results.

financial condition. Although such forward-looking statements have been made in good faith and are based on assumptions that the Company believes to be reasonable, there is no assurance that the expected results will be achieved. The Company's actual results may differ materially from the results discussed in forward-looking statements. Additional information on factors that may cause actual results and the Company's performance to differ materially is included in the Company's filings with the Securities and Exchange Commission (the "SEC"). Copies of such filings with the SEC are available publicly on the SEC's website at www.sec.gov or may be obtained by contacting the Company. Readers are cautioned not to place undue reliance upon any forward-looking statements, which speak only as of the date made. These forward-looking statements are made only as of the date hereof, and the Company does not undertake any obligations to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Item 9.01 Financial Statements and Exhibits.

Ensysce Biosciences Reports Fourth Quarter and Full Year 2023 Financial Results

~ Corporate Update Call to be Held Thursday, March 21, 2024 at 11:00am ET to Discuss Recent FDA Breakthrough Therapy Designation and Phase 3 Clinical Plans ~

SAN DIEGO, CA / ACCESSWIRE / March 15, 2024 / Ensysce Biosciences, Inc. ("Ensysce" or the "Company") (NASDAQ:ENSC), a clinical-stage company applying transformative chemistry to improve prescription drug safety, today reported financial results for the fourth quarter and full year of 2023.

Dr. Lynn Kirkpatrick, Chief Executive Officer of Ensysce, commented, "We are proud of the significant progress Ensysce has made in 2023 both operationally and clinically for our lead pain therapeutic, PF614, and our overdose protection product, PF614-MPAR. Our advancements were particularly instrumental in providing a foundation for our constructive end of Phase 2 meeting with the U.S. Food & Drug Administration (FDA) for PF614. We believe the FDA's guidance positioned Ensysce favorably and solidified the PF614 Phase 3 clinical study designs to initiate enrollment in the second half of 2024, ultimately reducing regulatory risks that could impede our commercialization plan. Especially encouraging was the FDA grant of Breakthrough Therapy designation to PF614-MPAR in January 2024, acknowledging its unique advantage over current opioids. Breakthrough Therapy, an exclusive designation applied to less than 300 drugs historically, offers Ensysce the opportunity to accelerate our clinical programs and go-to market plans."

"Importantly, the collective empirical data we've received from four completed clinical studies verify PF614's bioequivalence to commercially available opioids but with reduced abuse potential, and reaffirms our belief that Ensysce's PF614 will provide a "next generation" opioid family with the added value proposition of safer products with overdose protection. We have many reasons to remain optimistic on our path to regulatory approval as we advance through our Phase 3 clinical trials beginning in the second half of 2024. Progress in 2023 and early 2024 has provided further evidence that our innovative analgesics will provide prescribers and patients in severe pain with an alternative, effective option with safety advantages to address the opioid epidemic in the United States," concluded Dr. Kirkpatrick.

TAAPTM (Opioid Abuse Deterrent Program) Updates

Our lead product, PF614, is a Trypsin-Activated Abuse Protection (TAAPTM) extended-release oxycodone and a potential "next generation" analgesic for severe pain. The Company's TAAPTM technology is designed to control release, be highly resistant to tampering, and reduce abuse through a unique chemical modification. PF614's TAAPTM modification makes it inactive until it is swallowed, following which it is activated or 'turned on' to release oxycodone by the body's own trypsin, an enzyme in the small intestine. Ensysce recently completed a Phase 2 clinical trial for PF614, received FDA guidance on the strategy and design of its Phase 3 clinical program and expects to commence enrollment for the Phase 3 clinical trial in the second half of 2024. Ensysce believes it has a body of evidence showing that PF614 works as designed, has a good safety profile and is bioequivalent to OxyContin providing strong efficacy, yet reduced abuse potential.

As a reaffirmation of the Company's belief in the efficacy of PF614, on February 15, 2024, the Company announced the online publication of its manuscript entitled, "Clinical evaluation of PF614, a novel TAAPTM prodrug of oxycodone, versus OxyContin® in a multi-ascending dose study with a bioequivalence arm in healthy volunteers" by the open-access medical journal Clinical and Translational Science (CTS) sponsored by the American Society of Clinical Pharmacology and Therapeutics (ASCPT). The results from the two-part PF614-102 study demonstrate a clear dose relationship between PF614 and oxycodone, which is the foundation for the FDA submission.

As previously mentioned, on January 31, 2024, the Company completed a successful End of Phase 2 meeting with the FDA regarding PF614 and received guidance on its nonclinical development approach and clinical development plans.

Instrumental to the meeting was the PF614-201 study, "A Randomized, Double-Blind, Placebo-Controlled Crossover Study of PF614 on Analgesic Response in the Cold Pressor Test in Healthy Male Subjects" that concluded in December 2023. This study measured the time-of-onset of pain-relief in healthy volunteers and showed that Ensysce's TAAPTM chemical approach delivers effective analgesia. This study was a meaningful component of the Company's Phase 3 clinical protocol design and a driver of the positive outcome with the FDA.

MPAR[®] (Opioid Abuse Deterrent and Overdose Protection Program) Updates

PF614-MPAR is a combination product of the TAAP prodrug PF614 with a trypsin inhibitor, designed to treat severe pain while providing overdose protection. MPAR[®] (Multi-Pill Abuse Resistance) reduces or 'turns off' the release of the opioid to prevent an overdose, providing an additional layer of protection to Ensysce's TAAP™ medications. Over the past year, clinical data demonstrated that the MPAR[®] technology reduces release and absorption of oxycodone from PF614 when consumed in more than a prescribed dose.

Importantly, in January 2024, Ensysce received notice from the FDA that it had granted Breakthrough Therapy designation for PF614-MPAR, acknowledging the potential impact of the innovative MPAR[®] overdose protection technology. Breakthrough Therapy is an elite designation that expedites the development and review of drugs that are intended to treat a serious condition where the drug may demonstrate substantial improvement over available therapies.

In February, the Company received additional productive guidance from the FDA to aid the design of our PF614-MPAR programs to efficiently move toward a new drug application (NDA) submission and approval to bring this innovative drug to market.

Financial Results

Cash – Cash and cash equivalents were \$1.1 million as of December 31, 2023, as compared to \$1.5 million as of September 30, 2023. After year end, the Company received cash proceeds of \$2.1 million from the exercise of warrants, originally issued in the fourth quarter of 2023, to purchase 1.3 million shares of common stock. Additionally, in February 2024, the Company received gross proceeds of \$4.7 million, prior to deducting placement agent fees and offering expenses, from the exercise of warrants to purchase 3.6 million shares of common stock originally issued in May 2023.

Federal Grants – Funding under federal grants totaled to \$0.5 million for the fourth quarter of 2023 compared to \$1.4 million in the comparable year ago quarter. For the full year of 2023, funding from federal grants was \$2.2 million compared to \$2.5 million for the full year of 2022. The decreases are due to the timing of research activities eligible for funding, particularly relative to the MPAR[®] program.

Research & Development Expenses – R&D expenses were \$2.2 million for the fourth quarter of 2023 compared to \$6.4 million for the same period in 2022. For the full year of 2023, R&D expenses were \$7.6 million compared to \$19.8 million for the full year of 2022. The decreases were primarily the result of reduced external research and development costs related to the clinical programs for PF614 and PF614-MPAR, particularly regarding bioequivalence and human abuse potential studies for PF614.

General & Administrative Expenses – G&A expenses were \$1.4 million in the fourth quarter of 2023, a slight increase compared to \$1.2 million for the same period of 2022. For the full year of 2023, G&A expenses were \$5.4 million, a decrease compared to \$6.9 million for the full year of 2022. The quarterly increase from the same prior year period was primarily a result of higher non-cash stock-based compensation, while the full year decrease resulted from reduced consulting, legal, liability insurance and employee bonus expenses.

Other Income (Expense) - Total other income (expense), net was an expense of \$0.3 million for the fourth quarter of 2023 compared to income of \$0.7 million for the same

period of 2022. For the full year, total other income (expense), net was income of \$91,912 in 2023 compared to income of \$14,410 in 2022. The changes in other expenses were primarily due to non-cash fair value adjustments for convertible notes and warrants.

Net Loss – Net loss attributable to common stockholders for the fourth quarter of 2023 was \$3.5 million compared to \$5.5 million for the fourth quarter of 2022. For the full year of 2023, net loss was \$10.6 million compared to \$25.1 million for the full year of 2022. As a clinical stage biotech company, our continued research and development efforts toward regulatory approvals for our product candidates are expected to result in losses for the foreseeable future.

Corporate Update Conference Call

Ensysce CEO, Dr. Lynn Kirkpatrick, CFO, Dave Humphrey, and CMO, Dr. William Schmidt, will host a conference call on Thursday, March 21, 2024, at 11:00am ET to provide a corporate update and review recent company milestones. The call will conclude with Q&A from participants. An accompanying updated presentation will be posted prior to the call to the Company's investor relations website.

Date: Thursday, March 21, 2024 Time: 11:00am ET U.S/ Dial-in: 1-877-407-0792 International Dial-in: 1-201-689-8263 Webcast: ENSC Corporate Update Call

Please dial in at least 10 minutes before the start of the call to ensure timely participation. A playback of the call will be available through Thursday, April 4, 2024. To listen, call 1-844-512-2921 within the United States and Canada or 1-412-317-6671 when calling internationally. Please use the replay pin number 13744594.

About Ensysce Biosciences

Ensysce Biosciences is a clinical-stage company using its proprietary technology platforms to develop safer prescription drugs. Leveraging its Trypsin-Activated Abuse Protection (TAAPTM) and Multi-Pill Abuse Resistance (MPAR[®]) platforms, the Company is developing unique, tamper-proof treatment options for pain that minimize the risk of both drug abuse and overdose. Ensysce's products are anticipated to provide safer options to treat patients suffering from severe pain and assist in preventing deaths caused by medication abuse. The platforms are covered by an extensive worldwide intellectual property portfolio for a wide array of prescription drug compositions. For more information, please visit <u>www.ensysce.com</u>.

Definitions

TAAP: trypsin activated abuse protection - designed to protect against prescription drug abuse.

MPAR: multi-pill abuse resistance - designed to protect against abuse and accidental overdose.

Forward-Looking Statements

Statements contained in this press release that are not purely historical may be deemed to be forward-looking statements for the purposes of the safe harbor provisions under The Private Securities Litigation Reform Act of 1995 and other federal securities laws. Without limiting the foregoing, the use of words such as "may," "intends," "can," "might," "will," "expect," "plan," "possible," "believe" and other similar expressions are intended to identify forward-looking statements. The product candidates discussed are in clinic and not approved and there can be no assurance that the clinical programs will be successful in demonstrating safety and/or efficacy, that Ensysce will not encounter problems or delays in clinical development, or that any product candidate will ever receive regulatory approval or be successfully commercialized. All forward-looking statements are based on estimates and assumptions by Ensysce's management that, although Ensysce believes to be reasonable, are inherently uncertain. All forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those that Ensysce expected. In addition, Ensysce's business is subject to additional risks and uncertainties, including among others, the initiation and conduct of preclinical studies and clinical trials; the timing and availability of data from preclinical studies and clinical trials; expectations for regulatory submissions and approvals; potential safety concerns related to, or efficacy of, Ensysce's product candidates; the availability or commercial potential of product candidates; the ability of Ensysce to fund its continued operations, including its planned clinical trials; the dilutive effect of stock issuances from our fundraising; and Ensysce's and its partners' ability to perform under their license, collaboration and manufacturing arrangements. These statements are also subject to a number of material risks and uncertainties that are described in Ensysce's most recent annual report
